Continuous Assessment Test II – October 2023

Programme	: MCA		Semester	:	Fall 2023-2024
Course Title	: **Probability and Statistics**		Code	:	PMAT501L
			Slot	:	E1+TE1
Faculty	: Dr. Saroj Kumar Dash		Class No.	:	CH2023240101711
Time	: **90 Minutes**		Max. Marks	:	**50**

Answer ALL the Questions (5x10 = 50)

Q.No.	Sub. Sec.	Question Description	Marks
1.		Suppose X follows <u>uniform distribution</u> from 10 to 50. (i) Define the PDF and CDF for this X. And draw these two functions. (ii) Determine $P(X < 23 \mid X > 15)$.	[4+6]
2.		The length of life, in hours, of a drill bit in a mechanical operation has <u>Weibull distribution</u> with parameters α and β. (i) Find the values of α and β if the failure rate of the given Weibull distribution is: $Z(t) = \frac{1}{t^{2/3}}$. (ii) Find the probability that the bit will work even after 10 hours of usage.	[4+6]
3.		Suppose the <u>random variable</u> $X \sim Beta(\alpha, \beta)$, such that $\alpha + \beta = 5$ and the <u>standard deviation</u> of X, $\sigma = \frac{1}{5}$. (i) Find the values of α, β and the $E[X]$. (ii) And also find the probability that $X > \frac{1}{3}$.	[6+4]
4		A controlled satellite is known to have an error (distance from the target) that is <u>normally distributed</u> with mean 2 feet and standard deviation 4 feet. The satellite misson defines a success if the satellite comes within 10 feet of the target. (i) Compute the probability that the misson fails. (ii) Compute the probability that out of 5 mission at most one misson fails.	[5+5]
5.		The traveller A's travel time follows $Normal(15, 3)$ in minutes to reach the place B. (i) To get 99% success to reach the place B at 9am, what time the traveller A must start. (ii) To get 99% failure to reach the place B at 9am, what time the traveller A must start.	[5+5]
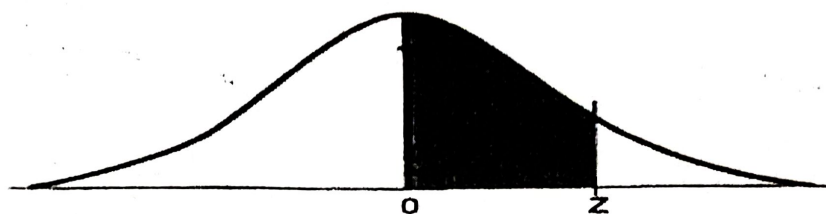

This table presents the area between the mean and the Z score . When Z=1.96, the shaded area is 0.4750.

Areas Under the Standard Normal Curve
